

North Carolina Manufacturing Extension Partnership

The North Carolina Manufacturing Extension Partnership (NCMEP) is the official state affiliate of the NIST MEP National Network™.

The Hollings Manufacturing Extension Partnership (MEP) is based at the National Institute of Standards and Technology (NIST). The National Program Office (NIST MEP) provides federal government funding for the MEP National Network™. The MEP program was created in 1988 by the Omnibus Trade and Competitiveness Act to improve the competitiveness of U.S. manufacturing by making manufacturing technologies, processes and services more accessible to small and medium-sized manufacturers (SMMs) with Centers in every state and Puerto Rico.

North Carolina Manufacturing Extension Partnership Network

The North Carolina Manufacturing Extension Partnership (NCMEP) is a network of North Carolina organizations that provide extension services designed to enhance productivity, increase capacity, and innovate products and technological performance of North Carolina manufacturing companies. Our goal is providing solutions and services that help North Carolina manufacturers save time and energy, improve productivity, increase sales, improve profits, innovate products, adopt technology and create and retain jobs.

The NCMEP supply chain program and **ManufacturedNC.com** online supplier database offers North Carolina manufacturers a free profile page to share information including products produced, materials used, capabilities and quality certifications to increase visibility and find new business opportunities. NCMEP provides free supplier scouting services to match supply chain needs locally and domestically. Tailored specifically to support the Buy America Initiative, this program fosters local sourcing and empowers manufacturers to access a diverse network of reliable suppliers. To find a new supplier, become a supplier or collaborate with industry peers, register at manufacturednc.com.
